35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 9 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. A "use" is not a statutory class of invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The scope of the variable "R" is not defined for compound "(II)" only for "(I)".

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5928418.

The reference teaches the addition of 0.17 to 0.83 % by weight asphalt of methyl gallate to asphalt at 155 C to prevent stripping and aggregate coated with said composition and allowed to cure. With respect to claim 4, the additive, methyl gallate, itself does not contain water and claim 4 does not exclude simultaneous addition thereof. Further the cured coatings after the emulsion has broken would appear to be substantially free of water.

The art made of record, but not relied upon, discloses various asphaltic compositions containing asphalt and gallic acid or an ester thereof.
